

USER GUIDE FOR GRAINPRO SUPERGRAINBAG HIGH CAPACITY™ (SGB-HC)

1

The SGB-HC comes in a set of hermetic liner and High Capacity Bag (HCB). Check SGB-HC for holes and tears before using. Insert the hermetic liner inside the HCB all the way through the downspout.

2

Close the zipper of the hermetic liner downspout and insert it inside the downspout of the HCB. Tie the downspouts together and roll inside the bonnet.

3

Close the bonnet by tying. Ensure that a smooth bottom is attained. Make sure that the downspout is properly tied so no loose grain is able to pass through.

4

Pour grains or seeds gently into the hermetic liner. Make sure no grain gets between the liner and the bag.

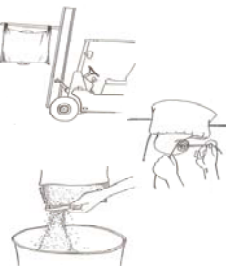

5

Seal the zipper by inserting slider at one end of zipper, ensure that the zipper tracks are positioned in the groove of the slider. Move slider to the other end to engage corresponding tracks.

6

Close the duffle to protect and to cover the liner completely.

7

To unload, elevate the bag, open the bonnet and unroll the downspouts. Untie the HCB downspout and manually open the zipper of the hermetic liner downspout. Slowly provide an opening until grains start to fall.
